Haseeb Choudhary

Ruby on Rails Developer · Full Stack · PostgreSQL · Stimulus · Docker

haseebch211@gmail.com +92 303 4730398 github.com/haseebchoudhary lexiqamus.com/lexiqamus
Pakistan

SUMMARY

Ruby on Rails developer with hands-on experience building and maintaining production web applications, including **LexiQamus**, a linguistic research platform, and a multi-tenant e-commerce system. Comfortable across backend architecture, authentication, search, APIs, and responsive frontend development.

Works with AI-driven tools (**Cursor, Claude, Codex**) for spikes, refactors, and documentation, using scoped prompts and reviewing every diff before it ships.

TECHNICAL SKILLS

Languages	Ruby, JavaScript, Python (project work)
Frameworks	Ruby on Rails, Laravel, Django
Frontend	HTML/CSS, Bootstrap 5, ERB, Stimulus
Data & tools	PostgreSQL, MySQL, Docker, Git/GitHub, REST APIs
AI tools	Cursor, Claude, Codex
AI/ML	PyTorch, DenseNet-121, ConvNeXt-Base, Swin Transformer
Practice	MVC architecture, authentication & authorization, multi-tenant applications, debugging & performance

EXPERIENCE

Ruby on Rails Developer · Evolving Bits

Mar 2026 – Present

- Develop and maintain **LexiQamus**, a Rails-based dictionary and linguistic research platform, across backend and frontend (lexiqamus.com/lexiqamus).
- Own authentication, advanced search, citation, CMS/admin, and API integration features.
- Build and modify Rails models, controllers, and migrations; debug and ship fixes using Docker and Git/GitHub.

Ruby on Rails Intern · Evolving Bits

Oct 2025 – Jan 2026

- Built a Shopify-style multi-tenant e-commerce platform in Rails with subdomain-based tenant isolation.
- Delivered role-based admin and seller dashboards for products, orders, inventory, and sales metrics with a responsive Bootstrap UI.

PROJECTS

LexiQamus

Production

Rails · Docker · Git/GitHub

- Rails-based dictionary and linguistic research platform, live at lexiqamus.com/lexiqamus.

AI-Based Brain Stroke Detection System

Final-year project

Django · PostgreSQL · PyTorch · Deep Learning

- Multi-modal diagnosis system classifying brain CT scans as Normal, Ischemic, or Hemorrhagic using an ensemble of DenseNet-121, ConvNeXt-Base, and Swin Transformer (**95.2% accuracy**), plus a Random Forest clinical model.
- Developed the full Django application, including doctor/admin roles, patient management, CT upload, and diagnosis history.

E-commerce Analytics Dashboard

Rails project

Rails · Bootstrap 5 · Stimulus

- Admin and seller dashboards tracking revenue, orders, and inventory across isolated stores, with low-stock alerts and role-based views.

EDUCATION

BS Software Engineering · Lahore Garrison University — 2026

FSc Pre-Engineering · Punjab Group of Colleges, Sialkot — 2022
